**Subject**  
Blancco Data Cleaner evaluation by the NLNCSA

Dear Mr. Väisänen,

The CD ROM product for Blancco Data Cleaner version 4.2 release 2 NL and the BDC version 4.4 NL have been subject to testing and evaluation by the Netherlands National Communication Security Agency (NLNCSA). These activities were performed during the year 2004 and for the latter version during the summer of 2005. Frequently in that period there was contact between your personnel and personnel of the NLNCSA and this co-operation was very much appreciated. The testing and evaluation ended with a positive outcome and advise to the Dutch national approval board.

The official paper that states that the CD ROM product for Blancco Data Cleaner has been approved for Dutch Governmental use up to the level of SECRET, was signed by the deputy Director of the AIVD (General Intelligence and Security Service) in June 2005. After your request I recently decided the release of the approval documents to your company (find attached). Unfortunately these documents are written in Dutch, but I'm confident Mr Ariel Figueras will be able to translate them for you.

Blancco Ltd. Finland is allowed to use this information for selling the BDC CD ROM product to Dutch Governmental clients. Use of this information for other marketing, sales and advertising purposes is subject to prior written agreement on a case by case basis by me.

HEAD OF THE NATIONAL COMMUNICATIONS SECURITY AGENCY  
DEPARTMENT,

P.J.M. Hin

Algemene Inlichtingen-  
en Veiligheidsdienst
